BSA MOTORS

DIVA:
As the name suggests, BSA Diva is targeted squarely at young girls, with its pastel colours and curvy design. The 250-watts battery pack gets charged in 6-8 hours, which is good for 70km. The payload is good for one adult and a kid, and the top speed is a modest 25kmph.

ROAMER NXG:
The Roamer NXG is a full-sized eScooter, with a huge 500-watts battery. Thanks to the higher capacity battery, the top which is a decent 40kmph in Power Mode, and the range extends to 60km in Economy mode, with two adults on board. The under-seat storage swallows a full-faced helmet.

STREET RIDER:
This futuristic looking scooter is like no other. Aimed squarely at style-conscious school kids BSA Street Rider features a lockable storage box, sports colour combinations, bigger seat, alloy wheels and telescopic shock absorbers. The frame is capable of carrying an adult with a child. At the heart of the scooter is a 250-watts battery doing duty and the range is 70km.
